

Our Vision for Science

All children strive to be the best scientists they are able to be and have a sense of awe and wonder about the world they live in. They are enthused by science and their natural curiosity is stimulated through a hands on and enquiry based approach.

We are curious about science and ask questions about our learning.

We are collaborative, working together and discussing our thoughts using scientific vocabulary.

We are resourceful, selecting easily accessible equipment to support our enquiries.

We are creative, using different types of enquiry and hands on investigation across the science curriculum.

We are adventurous, applying what we have learnt in different contexts and in the real world.
