

Dear Parents/Carers,

Please find attached some activities and tasks to help keep your child (ren) occupied during our school closure.

We have found a range of things including: English, Maths, Science and other curriculum areas.

We have also included a list of useful website links which give a variety of practical, paper and online things your child can do. The school website also contains some links you may find useful.

Please don't feel the need to print everything off, the children could just record their responses/answers on paper. We hope you find them useful and we look forward to seeing them on their return school.

To access some of the material/links on TWINKL you can create an account. At the moment, they are letting people do this free of charge. You will need the code: UKTWINKLHELPS.

We have sent each child home with a wallet in order to help keep all their school things together. This is not an exhaustive list and we're sure you'll have some great ideas of your own. Feel free to keep these in the wallet too.

Thank you in advance for your support in these challenging times - have fun learning!

Miss Morton and Mr. Gaffney
