

Year 1 Topic Learning - Week beginning 8th June

Please have a go at completing as many of these activities as possible. We would normally teach one Topic lesson per day in school, so this will be equivalent to what your child would normally be doing. Thank you!

Please feel free to take a picture of any of the activities and email them to Miss Morton or Mr Gaffney - we love getting updates on what everyone is doing!

R.E.

Research the Jewish Festival Hanukkah and write down 4 facts and draw a picture to illustrate your lovely work!

Espresso - Topic

Please make use of the 'Espresso' Topic videos/resources to support your child's learning.

Username - student17917

Password - pupils

To find the Topic resources, click 'Key Stage One' and then click the subject you would like to use from the drop down list. You will find a variety of videos and resources that cover many topic aspects.

Science

Have a think about different facts about summer: the weather, the temperature, the different types of clothes we wear and variety of flowers you can see. Have a go at creating a super fact file to display your research.

Art

Have a look at 'Camille and the Sunflowers' on YouTube. It is a short clip about Vincent Van Gogh. Can you draw a sunflower using a pencil and shade it in; using the pencil (monochrome) or using a pencil crayon. Please demonstrate how to shade with a pencil to your child as this is something Year One children sometimes struggle with.

D.T.

Design and make a sandwich using your favourite fillings. Take your sandwich outside to eat and enjoy as part of a picnic. Can you draw a picture of your lovely sandwich and label it?

P.E.

Can you create an exciting trail for someone to follow - it could be as part of a walk or in your back garden.

5 jumps,
10 steps,
3 star jumps
6 frog hops
etc.
