

Year 2 Home Learning - Topic - Week Beginning 29th June 2020

Here are some suggested activities to do with your child at home that are linked to our current learning. Thank you for your continued support.

PSHE/Science

Now that you have learnt a little more about the oceans, can you find out about how we can help to protect them? There is lots of pollution and plastic affecting animals in the sea and on our beaches. You could create a poster or presentation to let people know how to care for them.

D.T.

Can you design the perfect beach outfit for one of your teddies. Remember, it needs to be cool and light but also protect you from the sun. You might want to include something for in case it rains.

Hope Project

As part of our new 'Hope Project' we would like to start reflecting on the last few weeks in a positive way.

Can you think of something positive that you have learnt or done, or something that has happened, during lockdown that you would like to share? You might have learnt a new skill, done something nice for your family, neighbours or charity, enjoyed spending time together, or noticed something positive in the world or in nature. You could share your positive thoughts in a picture or short video, make a poster or drawing, or write a message.

P.E.

It is always good to get lots of exercise in a day. Try to get as many steps as you can each day. Can you get more steps than the rest of your family? Can you challenge yourself to get more steps each day? If you don't have a step counter, you could see how many times you can walk around your garden or your house.

Espresso - Topic

Please make use of the 'Espresso' Topic videos/resources to support your child's learning.

Username - student17917

Password - pupils

To find the Topic resources, click 'Key Stage One' and then click the subject you would like to use from the drop down list. You will find a variety of videos and resources that cover many topic aspects.
