

Lunar Theme Park

If you are looking for a creative challenge and something to keep yourself busy, look no further as this is an exciting project that we are sure that you will really enjoy! You will explore money, how we spend it and learn how to budget. Many people flock to theme parks all around the world for fun and laughter, and to experience the thrill and adrenaline of rollercoaster rides. In this project, you get to design your own amusement park and consider carefully about how you would run it. Below, the project is introduced to you and you have a price list and guidance on how to plan and map out your park.

The year is 2050. Man is now colonising the moon
and you have decided to open the first lunar theme park in history.
Your spending limit is £500,000.

You must carefully decide what sort of rides you are going to have. You also need to think about the other facilities visitors will need when they come to your theme park like toilets, cafes, shops and paths between all the facilities and rides.

Many theme parks have different areas that are 'themed'. In other words, they might have an African area, a wild west American area or an Old England area. Think carefully about what you want to have in yours.

Set up your theme park.

Remember, your spending limit is £500, 000. Design and draw your theme park on squared paper if you can. If you don't have squared paper, you could draw your own squares. You must not go over your spending limit and you must have car parks, toilets, paths to connect all the items, cafes and shops for your visitors, not just rides.

Item	Number of Squares	Cost
Major ride (large ride)	9	£50 000
Minor ride	6	£20 000
Café	4	£10 000
Shop	4	£7 000
Vending Machine	1	£500
Toilets	4	£1 000
Paths		£40 per 1cm length (Paths can be drawn using a single line)
Lake		£5 000 per square
Car park		£500 per square

Happy designing Year 6! We would love to see your creative ideas, so do please send some photos to us via our class email or Purple Mash so that we can see all of your efforts.
