

Geography Blog Autumn 2 2025

At Helmshore Primary School we are continuing to be the best geographers we are able to be. We have been keen to explore the world by comparing locations, investigating, researching different sources, writing and talking about different places.

We have been adding to our knowledge maps and vocabulary pots on a regular basis to deepen our knowledge and vocabulary.

Our ECO team have learnt ways to improve our carbon footprint in school. We have made 'Pick up your litter' posters to display in the playground. We also completed a quiz about our knowledge of recycling to share with our peers. We have enjoyed litter picking in our local area and we have planted broad beans in our planters.
